JMF Encourages Supporters to Join the San Diego County Water Authority's 20 Gallon Challenge

The Jarrett Meeker Foundation invites our supporters and community members to take part in the San Diego County Water Authority's 20 Gallon Challenge. The challenge is part of the effort to conserve water throughout the county.

Many of the children who benefit from our educational programs are already taking part to conserve water. At Central Elementary School's Conservation Celebration last spring, the third graders presented their water conservation ideas through posters and displays in the school library. See our July 17, 2007 announcement to learn more about the event and our program with Central's students.

For more information about the 20 Gallon Challenge, go to www.20gallonchallenge.com. The website also has many water-saving tips for residents and businesses.

Make your pledge to help save this precious natural resource now!
